EDUCATION

Bachelor of Science, Mechanical Eng.

Sept 2022 – June 2027

Addis Ababa University

RELEVANT SKILLS

- Python (Pandas, NumPy, Matplotlib, Seaborn)
- SQL (PostgreSQL, MySQL)
- Power BI, Excel, Jupyter Notebook
- Classification, Regression, Data Preprocessing, Model Evaluation
- Data-driven decision making
- Market and customer behavior analysis
- Business intelligence reporting
- Critical thinking and problem-solving
- Communication and teamwork

PROFILE

Analytical and creative Mechanical Engineering student with a strong passion for data analytics and business intelligence. Skilled in using Python, SQL, Power BI, and Excel to uncover insights and support data-driven decision-making. Experienced in working within a digital marketing environment, supporting technical operations, and optimizing performance through analytics.

PROFESSIONAL EXPERIENCE

Technical Team Assistant – *Digital Marketing Agency*

Axio Agency / Addis Ababa / 2023 – 2024

- Supported the agency's marketing and analytics team in managing client data and performance reports.
- Assisted in implementing digital automation tools for ad tracking and performance measurement.
- Worked with website and campaign data to analyze audience engagement and campaign ROI.

Freelance Data Analyst (Project-Based Work)

2025 – Present

- Designed and analyzed datasets using **Python (Pandas, NumPy)** and **SQL** to extract business insights.
- Built dashboards in **Power BI** for sales, customer, and financial analysis.
- Created predictive models (classification and regression) to forecast trends and behavior.

Impactful Projects

1. Human Movement Detection using Mobile Sensors

- Used data from the Sensor Logger app to analyze acceleration and gyroscope readings. Trained a classification model in Python to predict whether a user is walking or running. Proposed applications for accident detection and emergency alert systems.

2. Business Analytics Report – E-Commerce Sales

- Conducted sales and customer behavior analysis using SQL and Python, Power BI dashboards showing top-performing regions, products, and customer trend
